

Youssef Hussien Ahmed

Back-End Developer

Cairo, Maddi | 011 5863 8306 | [Gmail](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Results-driven Back-End Developer specializing in Node.js and Express.js with hands-on experience building scalable RESTful APIs, authentication systems, and database-driven applications. Skilled in developing secure server-side architectures using MongoDB, SQL, JWT authentication, and role-based authorization. Experienced in payment integration, cloud deployment, and clean code practices. Passionate about building high-performance backend systems and continuously improving software scalability, security, and maintainability.

Education

Bachelor of Management Information Systems Modern Academy for Management

Information System | 2021 – 2025 | Cairo, Egypt

Full-Stack Diploma — MERN Stack Route Academy | 2023 – 2024 | Cairo, Egypt

Internship Experience

Back-End Intern — IT Gates | Jun 2023 – September 2023

Assisted in developing and testing backend APIs using Node.js and Express.js.

Collaborated with developers in debugging and improving backend functionality.

React.js & Next.js Intern — Dev Academy | Jun 2024 – September 2024

Participated in building responsive frontend interfaces using React.js and Next.js.

Improved understanding of full-stack development workflows and frontend integration

Projects

E-Commerce Dashboard

[Code Repo](#)

- Developed a scalable backend architecture for a full-featured e-commerce platform supporting authentication, authorization, and CRUD operations.
- Built secure RESTful APIs with JWT authentication and role-based access control. Integrated Stripe payment gateway for secure online transactions.
- Optimized MongoDB queries and database structure to improve application performance and scalability.

Job Search App

[Code Repo](#)

- Built a backend job management system supporting job posting, application tracking, and role-based permissions, Designed secure APIs with JWT authentication and middleware-based authorization.
- Structured MongoDB schemas for efficient application scalability and maintainability.

Facebook Clone Backend

[Code Repo](#)

- Developed backend services for a social media platform including user management, posts, and real-time messaging functionality.
- Designed modular and scalable server architecture using Sequelize ORM and SQL databases.
- Implemented secure authentication and authorization mechanisms using JWT.

Sara7a App (MVC Architecture)

[CodeRepo](#)

- Developed a full-stack anonymous messaging platform following MVC architecture principles. Implemented session-based authentication, validation, and server-side rendering using EJS.
- Deployed the application on Vercel and optimized MongoDB schema relationships for efficient querying

Technical Skills

- **Programming Languages:** JavaScript (ES6+), TypeScript
- **Backend Technologies:** Node.js, Express.js, NestJS
- **Databases:** MongoDB, Mongoose, MySQL, SQL, Sequelize ORM
- **APIs & Authentication:** RESTful APIs, GraphQL, JWT Authentication, Role-Based Authorization
- **Tools & DevOps:** Git & GitHub, Docker, Vercel, Render, MVC Architecture
- **Additional Features:** Socket.io, Stripe Payment Integration, File Upload Systems, Email Services, Input Validation, Error Handling
